In planning for Tomorrow’s Sydney, we are building a new light rail line to provide modern, reliable and sustainable public transport that will transform services from Circular Quay and the CBD, to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

**Day time tram testing will commence in the CBD North from Town Hall to Circular Quay from Wednesday 28 August 2019**

Initial day time testing of trams will take place between Mondays and Fridays outside of peak traffic times, between 10am and 2pm. This period will extend and expand over the coming weeks.

The testing and commissioning of systems and trams is an important part of preparation for light rail operations.

During initial day time testing:

- The testing zone will be along the light rail tracks extending from the intersection of George Street and Bathurst Street, along George Street onto Alfred Street to the intersection of Loftus Street.
- Trams speeds will be walking pace to start with and will increase over time. The number of trams will also increase.
- Trams, pedestrians and traffic will be supported by traffic controllers to facilitate this new change.
- Initially, trams and traffic will be managed under police escort and traffic control.
- Night time tram testing will continue in the CBD North alongside day time testing.
- Construction activities will continue at night and on weekends where required. Please refer to construction notifications for further information on out of hours work occurring in each zone.

Please note that light rail systems are now energized in this area and hazard zones are now in place around the light rail tracks. Works to be completed in or near the hazard zone require a permit to work. For more information about the hazard zone and safety during testing and commissioning and what it means for you, please visit [https://sydneylightrail.transport.nsw.gov.au/safety](https://sydneylightrail.transport.nsw.gov.au/safety).

**Equipment and vehicles** for this work may include trams and traffic control vehicles.

Testing may involve some temporary traffic and pedestrian changes. Where required, traffic control will be in place to safely direct motorists and pedestrians.

Drivers are encouraged to visit [livetraffic.com](http://livetraffic.com) for up-to-date information about traffic changes.

For further information, please call the Project Infoline on **1800 684 490**.
